

# UnderWriter<sup>™</sup> Report

EagleView<sup>®</sup> Technologies announces another industry-changing document, the EagleView UnderWriter Report. Powered by EagleView's existing patent-pending software, scalable operations and the most experienced technicians in the industry, the UnderWriter Report integrates key parcel and property data along with EagleView measurement expertise to create a report that is invaluable for underwriter use prior to issuing insurance policies and in re-underwriting existing books of business.

*The UnderWriter Report includes bird's eye views to identify potential hazards*

Insurance carriers trust EagleView as the independent third party for roof measurements during the claims process. Now the insurance underwriting community can trust EagleView for independent third-party underwriting reports.

- Risk ratings for wind, hail, flood, earthquake and fire
- Complete property measurements
- Structure information
- Hazard notations
- Full images of property and neighborhood
- Footprint diagrams of property and structures
- Completely customizable
- Aggregated data from a single source
