

# EagleView Reveal™

Imagery that helps you work smarter — remotely

“The technology is amazing! EagleView has allowed my organization to ‘work smarter, not harder’ and has increased productivity, safety and accuracy.”

- Luke Robbins, Chief Appraiser, Young Central Appraisal District, Graham, TX

## MORE DETAIL FOR BETTER DECISIONS

EagleView Reveal is a portfolio of high resolution ortho and oblique imagery, derived from our unique image capture and processing systems. With highly detailed imagery and 360° views, Reveal delivers a complete remote solution for making accurate decisions while working safely and efficiently from your desk.

### GO THERE REMOTELY

Visit thousands of sites virtually from your office desk, avoiding the time, expense and hassle of travel. You'll keep employees safe and enable them to be more productive.

### SEE THE COMPLETE PICTURE

Reveal's oblique imagery gives you a 360° view that doesn't limit you to a single perspective. Detailed views of an entire property are accessible at your fingertips.

### GET UP CLOSE

With a 3-inch or better ground sample distance, you can zoom in to see details on the ground that are undetectable with standard aerial imagery<sup>1</sup>. Make critical decisions without estimates or guesswork.

### GET COVERAGE YOU CAN COUNT ON

Reveal's frequently updated imagery covers 98% of the United States population. Our library contains more than 1 billion images detailing both urban and rural areas.

<sup>1</sup> Reveal imagery provides up to 4x the detail of standard aerial imagery, based on proprietary research comparing thousands of images

# A COMPLETE IMAGERY SOLUTION FOR GOVERNMENT

Reveal integrates seamlessly with the applications government officials use most frequently to perform their jobs, including Esri ArcGIS, CAMA systems, and E911 systems. Reveal imagery is accessible via the web or on mobile devices through EagleView's CONNECT suite of applications, giving you the flexibility to access imagery and tools via standalone applications or integrated into your existing workflow.

## VIRTUAL ASSESSMENT

Reveal imagery brings assessment into the digital age by enabling staff to quickly and easily inspect multiple properties without leaving their desk. With our ChangeFinder<sup>1</sup> tool you can select a past date and see what's been built or modified since then, so tax rolls can be more frequently updated.

## EMERGENCY RESPONSE

EagleView Reveal's georeferenced imagery enables 911 operators to determine mobile caller locations in one click, so emergency personnel can be immediately dispatched. The imagery also provides situational awareness to help first responders identify hazards and formulate an effective response.

## PROACTIVE MONITORING

Frequently updated Reveal imagery enables counties to virtually monitor the condition of field assets that are often difficult or expensive to physically inspect. By proactively identifying risks from natural or man-made encroachment, agencies can take action before serious problems develop.

<sup>1</sup> ChangeFinder available separately at an additional cost

## TAILORED TO YOUR NEEDS

EagleView Reveal offers three standard products so you can select the one that meets your imagery needs. Advanced is the most complete package, but if you choose Essentials or Essentials+ you can purchase Certified Orthos, Four Band Color Infrared, and TrueTouch as add-ons.

	Essentials	Essentials+	Advanced
<b>Orthographic Imagery</b> Top-down imagery for a true view	●	●	●
<b>Oblique Imagery</b> Angled imagery for a natural perspective		●	●
<b>Certified Orthos</b> Produced to meet state and local requirements	*	*	●
<b>Four Band Color Infrared</b> See details undetectable by the naked eye	*	*	●
<b>TrueTouch</b> Visual enhancement of critical features	*	*	●

\*Available as a separately purchased add-on feature for Essentials or Essentials+

Resolutions are offered at Property Level (nominal 3-inch ground sample distance), for those that require the highest level of detail of properties and ground features, and Neighborhood Level (nominal 6-inch ground sample distance) providing exceptional detail and clarity for semi-urban and rural areas.
